Re: 12415 Coleraine Dr. Asphalt Plant – Statement of Vibration
Emissions

Aercoustics Engineering Limited was retained by Dig-Con International to issue a statement regarding the emission of vibrations from the operation of a proposed asphalt plant at 12415 Coleraine Drive in the town of Bolton, Ontario.

Based on Aercoustics' experience, typical operation of an asphalt plant does not produce significant levels of ground-borne vibrations off property. The proposed equipment and operations as of the date of this letter are understood to comprise standard operations of such a facility and therefore operation of the proposed facility is not expected to generate levels of vibration which have potential to exceed the limits put forth by the Ministry of the Environment and Climate Change at neighbouring receptors.

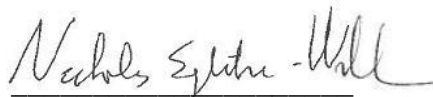

Please do not hesitate to contact us should you have any questions or require anything further.

Regards,

Aercoustics Engineering Limited

Kohl Clark, B.Eng.,

Nicholas Sylvestre-Williams, M. Eng., P.Eng.
